SUMMARY

Performance-driven IT Engineering student specializing in **AI-integrated Full-Stack Development**. Grand Finalist at MumbaiHacks 2025 (World Record Event), emerging from the top 13% of 27,000+ global applicants. Expert in building scalable backends and architecting Agentic AI solutions using LangChain, RAG, and the MERN Stack. Proven track record of deploying production-ready platforms like SkillBridge and TechTrendyDeals (Amazon Verified Partner), with extensive experience in LLM Fine-tuning, Embeddings, and automating complex data workflows.

ACHIEVEMENTS

- Grand Finalist | MumbaiHacks 2025 (World Record AI Event)** November 2025
- Selected in the top **13% of 27,000+ global applicants** for the world's largest Agentic AI hackathon.
 - Competed among **3,500+ builders**, contributing to a **World Record** that surpassed Google's previous participant milestone.
- Winner (2nd Place) | AMUHACK National Level Hackathon** Feb 2026
- Secured Runner-up position in the flagship national event among **100+ competing teams**.
 - Successfully cleared multiple rigorous rounds, including a final shortlist of the top 50 teams.
- 5x National Hackathon Finalist** 2025 – 2026
- Consistently recognized for rapid prototyping and building AI-driven solutions across various national platforms.

SKILLS

AI & Machine Learning: Generative AI, LangChain, RAG (Retrieval-Augmented Generation), Vector Databases (Pinecone/ChromaDB), LLM Integration (OpenAI, Hugging Face), TensorFlow, Model Fine-tuning, Embedding Techniques.

Backend Development: Node.js, Express.js, Fast API (Python), RESTful APIs, Postman.

Databases: MongoDB, MySQL, Vector DBs.

Frontend & UI: React.js, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3.

Languages: Python (NumPy, Pandas, Scikit-learn), JavaScript, Java, C.

Tools & Deployment: Git, GitHub, Vercel, Render, Antigravity Browser, Postman, VS Code.

PROJECTS

- SkillBridge – AI Placement Intelligence Platform** | Node.js, MongoDB, RAG, Fine-tuning March 2026
- Engineered a custom RAG (Retrieval-Augmented Generation) pipeline using Node.js and Vector Search to transform unstructured TnP data into structured, actionable placement insights.
 - Developed a specialized AI Guidance Model using Fine-tuned LLMs (GPT-4o/GPT-3.5) for multilingual career mentoring and context-aware placement advice.
 - Built an AI Video Interview Simulator integrating OpenAI Whisper for speech-to-text and HuggingFace (DistilRoBERTa) for real-time emotion and facial expression analysis.
 - Tech: Node.js, React, MongoDB, OpenAI API, Whisper, HuggingFace, face-api.js, Recharts, Clerk Auth.
- Bridge-AI – Academic-to-Career Translation Engine** | Python, FastAPI, RAG, MERN Stack Feb 2026
- Winner (Top Honors) | AMUHACKS 5.0:** Developed an AI ecosystem that extracts technical skills from academic PDFs using Vector Search to calculate a Career Readiness Score.
 - Architected a Role-Match Engine using Python and High-dimensional Skill Embeddings to compare user expertise against industry-standard job descriptions.
 - Integrated a Personalized AI Career Mentor powered by LangChain and FastAPI to automate industry-ready resumes and strategic learning roadmaps.
 - Tech: Python, FastAPI, LangChain, React.js, Express.js, MongoDB, OpenAI LLMs, Fine-tuning, Render.
- TechTrendyDeals – Full-Stack Affiliate Ecosystem** | React, Node.js, Amazon Partner API
- Designed and deployed an SEO-optimized blog platform on a custom domain, verified as an **Amazon Affiliate Partner** to drive automated product curation.
 - Integrated server-side affiliate logic and secure APIs to track and generate real-time revenue through data-driven affiliate marketing strategies.

EXPERIENCE

- Organizing Technical Member** | E-Summit, TCET (Mumbai) – Feb 2026 Nov 2025 - Feb 2026
- Website Development & Registration:** Played a key role in building the Official E-Summit Website, developing responsive UI components and a robust registration system for all participants.
 - Technical Operations & Management:** Managed the Registration Desk during the summit, handling the end-to-end digital flow and resolving technical queries for flagship events like the Build-a-thon and AI Workshops.
- Affiliate Marketing Specialist** | Freelance – June 2024 – Present June 2025 - Present
- Full-Stack Development & Monetization:** Engineered and managed TechTrendyDeals, a verified Amazon Affiliate platform that leverages SEO-driven product curation and custom-built APIs to generate consistent **real-world revenue**.

EDUCATION

- Bachelor of Engineering in Information Technology** Aug 2024 – Aug 2028
- Thakur College of Engineering and Technology, Mumbai
- Higher Secondary Education (HSE)** | Model College of Commerce & Science, Mumbai | 12th Complete
- Stream: Science** (Computer Science).
